

CHANDANA P DAS

Full Stack Developer (MERN Stack)

+91 7012161022 | chandanaadasp@gmail.com | Kerala, India | [Linkedin](#) | [GitHub](#) | Portfolio

PROFESSIONAL SUMMARY

Self-taught Full Stack Developer from Kerala with hands-on experience building complete MERN stack applications including a live e-commerce platform with payment integration and a JWT-secured task management system. Completed an intensive offline bootcamp at Brototype and gained practical teaching experience in AI & Robotics. Actively seeking junior developer roles to contribute to real-world products and grow within a professional team.

TECHNICAL SKILLS

Frontend: React.js, Redux, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST API

Database: MongoDB, MySQL, Firebase

Languages: JavaScript (ES6+), TypeScript, C++

Tools: Git, GitHub, Postman, Vercel, Render

Concepts: JWT Authentication, MVC Architecture, CRUD, Responsive Design

EXPERIENCE

AI & Robotics Teacher — Part-time

Jul 2025 – Mar 2026

Springs International School, Tana, Nilambur, Malappuram

- Taught AI concepts and robotics fundamentals to school students while continuing full-stack development studies.
- Prepared lesson plans, conducted hands-on sessions, and introduced students to basic programming and automation.
- Developed communication and presentation skills through regular classroom instruction.

PROJECTS

Elixir-aura — Full-Stack E-Commerce Platform

[repo link](#)

Tech Stack: Node.js, Express.js, MongoDB, EJS, Razorpay, MVC Architecture

- Built a multi-role e-commerce platform with separate admin and user dashboards, supporting product catalogue management and inventory workflows.
- Integrated Razorpay payment gateway for secure online checkout with order confirmation and automated invoice generation.
- Implemented sales reporting, wishlist, dynamic cart management, and fully responsive UI optimised for mobile and desktop.
- Structured backend using MVC principles for maintainability and scalability.

TaskFlow — Full-Stack Task Management Application

[repo link](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT Authentication, Axios

- Built secure user authentication with JWT, protected routes, and middleware verification for a multi-user task management system.
- Developed full CRUD operations for projects and tasks with cascading deletes and task completion toggling.
- Structured MongoDB schemas with ObjectId references to link users, projects, and tasks efficiently.
- Integrated Axios for frontend-backend communication with token-based authorisation handling.
- Designed a responsive, productivity-focused interface optimised across devices.

MINI PROJECTS

Netflix UI Clone — Streaming Platform Interface

[repo link](#)

Tech Stack: React.js, Tailwind CSS, Firebase

- Built a pixel-accurate, fully responsive Netflix-inspired UI with dynamic movie listings fetched from an external API, user sign-up/login via Firebase Authentication, and protected routes for authenticated users only.
- Implemented reusable React components, lazy loading for performance, and Tailwind CSS for consistent styling across screen sizes.

OLX-Inspired Marketplace UI — Categorised Product Listing App

[repo link](#)

Tech Stack: React.js, Firebase

- Developed a responsive second-hand marketplace interface with category-based product browsing, individual product detail pages, and a post-ad feature for sellers.
- Used React component architecture with props-driven design and clean state management for a smooth user experience.

Weather Forecast Application — Real-Time Weather Information App

[repo link](#)

Tech Stack: React.js, Vite, Weather API

- Developed a responsive weather application that provides real-time weather updates based on user-entered locations.
- Integrated external weather APIs to fetch and display current temperature, humidity, wind speed, and weather conditions dynamically.

EDUCATION

Full Stack Web Development

2024 – June 2026

Brototype, Kerala

Completed an intensive full-stack development programme with hands-on training in MERN stack, REST APIs, and real-world project building. Attended offline (2024–2025) and continued remotely thereafter.

Higher Secondary Education — Biology Science

2020 – 2022

GHSS Valayam, Kerala

LANGUAGES

English (Fluent) | Malayalam (Native)
